Advanced Biofuels Summary

So as to promote the production and use of Advanced Biofuels

• Implement stable and stringent blending mandates
• Remove subsidies of conventional fossil fuels
• Incentivize electricity from renewable sources
• Fair profit sharing mechanism with local biomass suppliers
• Penalize uncontrolled burning of agri- residuals on the field
• Governmental support to face feedstock supply risk (long term, fixed price, logistic investment).
• Integrated projects (Farmers, local investors, Government, technology providers)
• R&D programs. Technology must be adapted to different biomasses.
• Increasing access to feedstock via improved logistics
