

The experience in Hungary

Arnold Gór, crop expert, Hungarian Chamber of Agriculture

24. June 2016

What do we have...

...in urban
areas?

...or in rural areas?

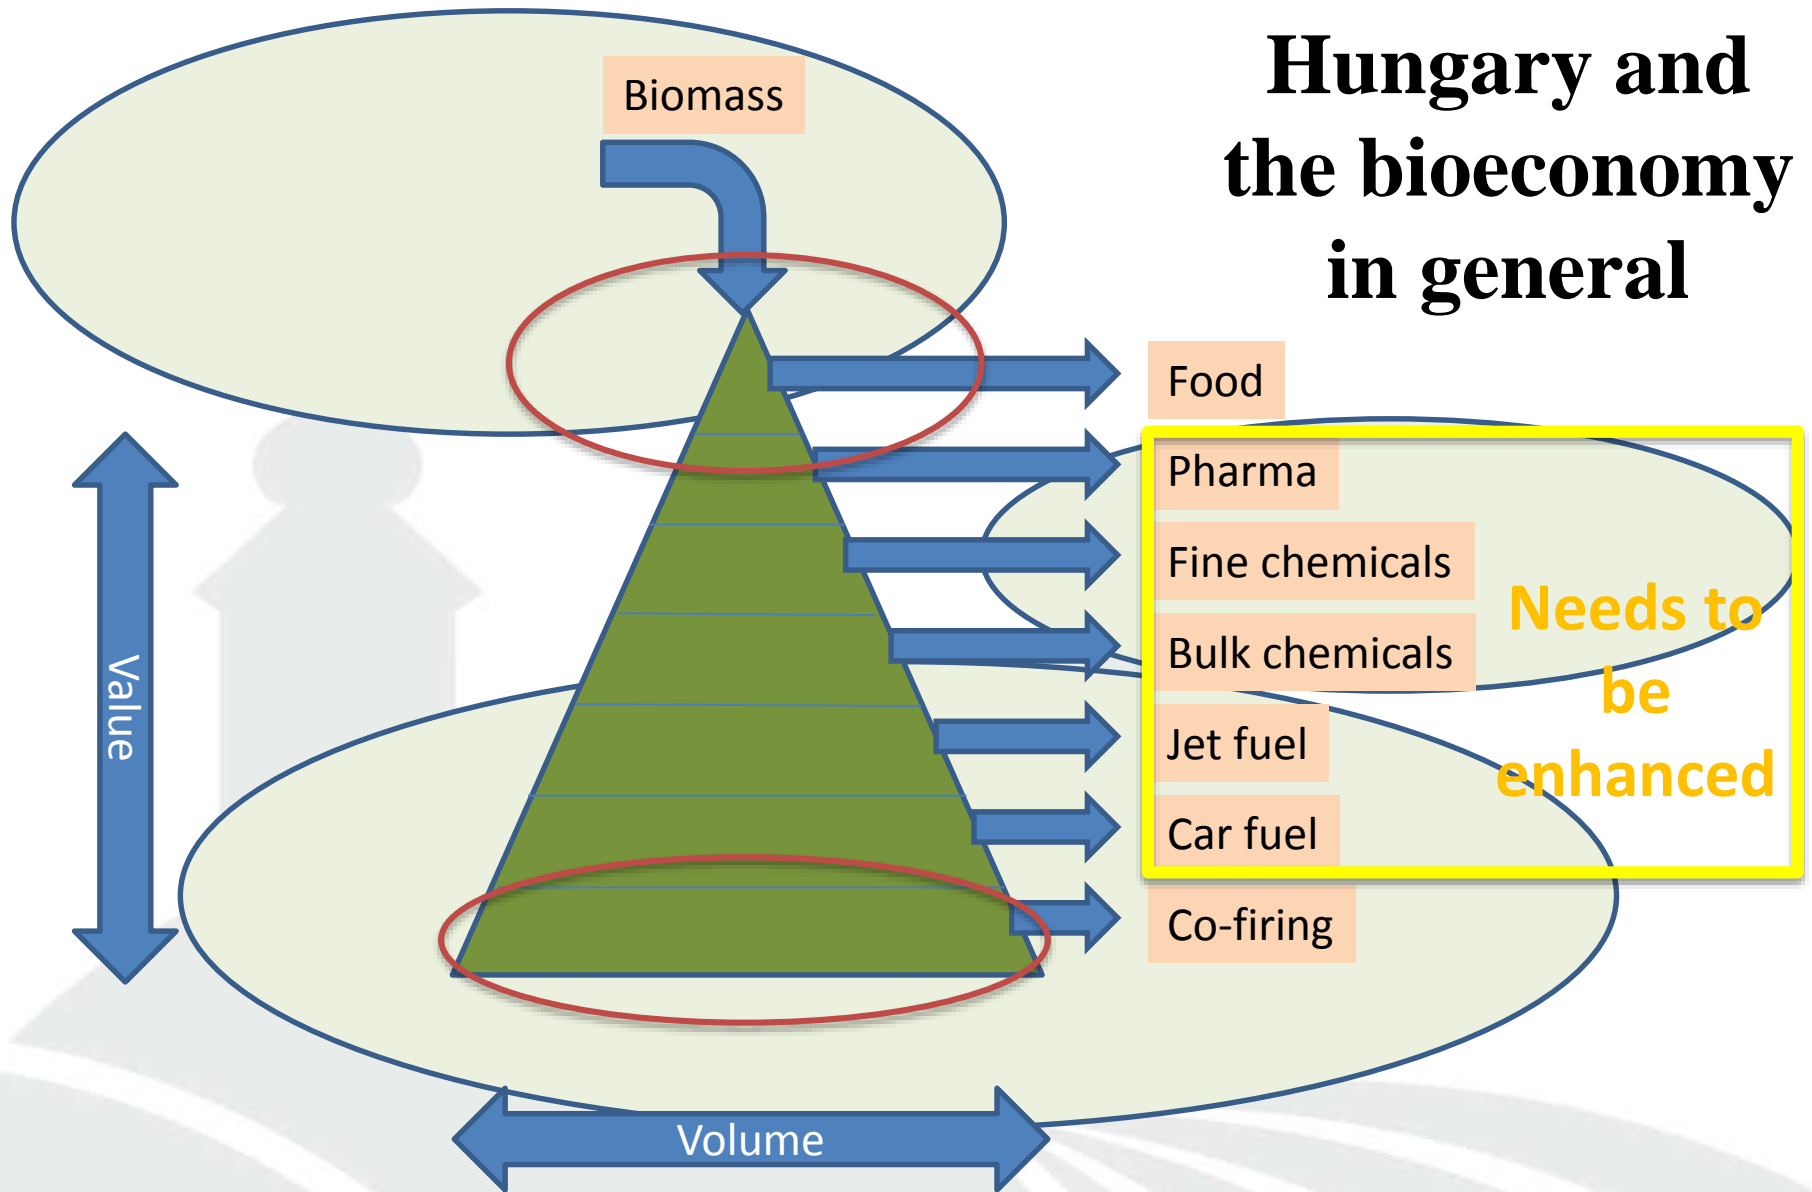

<http://4.bp.blogspot.com/-Y2pxZnQcNe0/VUPLfDmIXul/AAAAAAAAAG0A/LDSZeY0pLSU/s1600/kigy1909.JPG>

In short: We don't know!

Hungary and the bioeconomy in general

Source: Based on Kees de Gooijer, 4th Bioeconomy stakeholders' conference – 12 /04/ 2016

What is the potential?

Plant	Estimated potential 2016 (tonnes)
Winter wheat	4.900.000
Spring barley	300.000
Rye	100.000
Triticale	500.000
Winter rapseed/Colza	650.000

Suggestions

- Biofuel ethics
- Strict legal background

What about fossil fuels?

Unequal market positions

New value chains

Old grant system

Diminishing livestock production

Suggestions

- Reconversion of **marginal lands and semi arid areas**
- Collect, create and disseminate **valid business models**
- Make the **distance** from the field to the power plant as low as possible
- Encourage adoption of biobased products in **public procurement** criterias
- Access to **credits, fiscal measures** to adopt new technologies in production

Move towards **sustainable regions**

**The Hungarian Chamber of Agriculture offers
its assistance in the development period**

Thank You for Your attention!
