

SWOT ANALYSIS

Veronica Agodoa Kitti, ASA Initiative

ECOWAS/GBEP 5th Bioenergy Week, Ghana, Accra, 22nd 24th June 2017

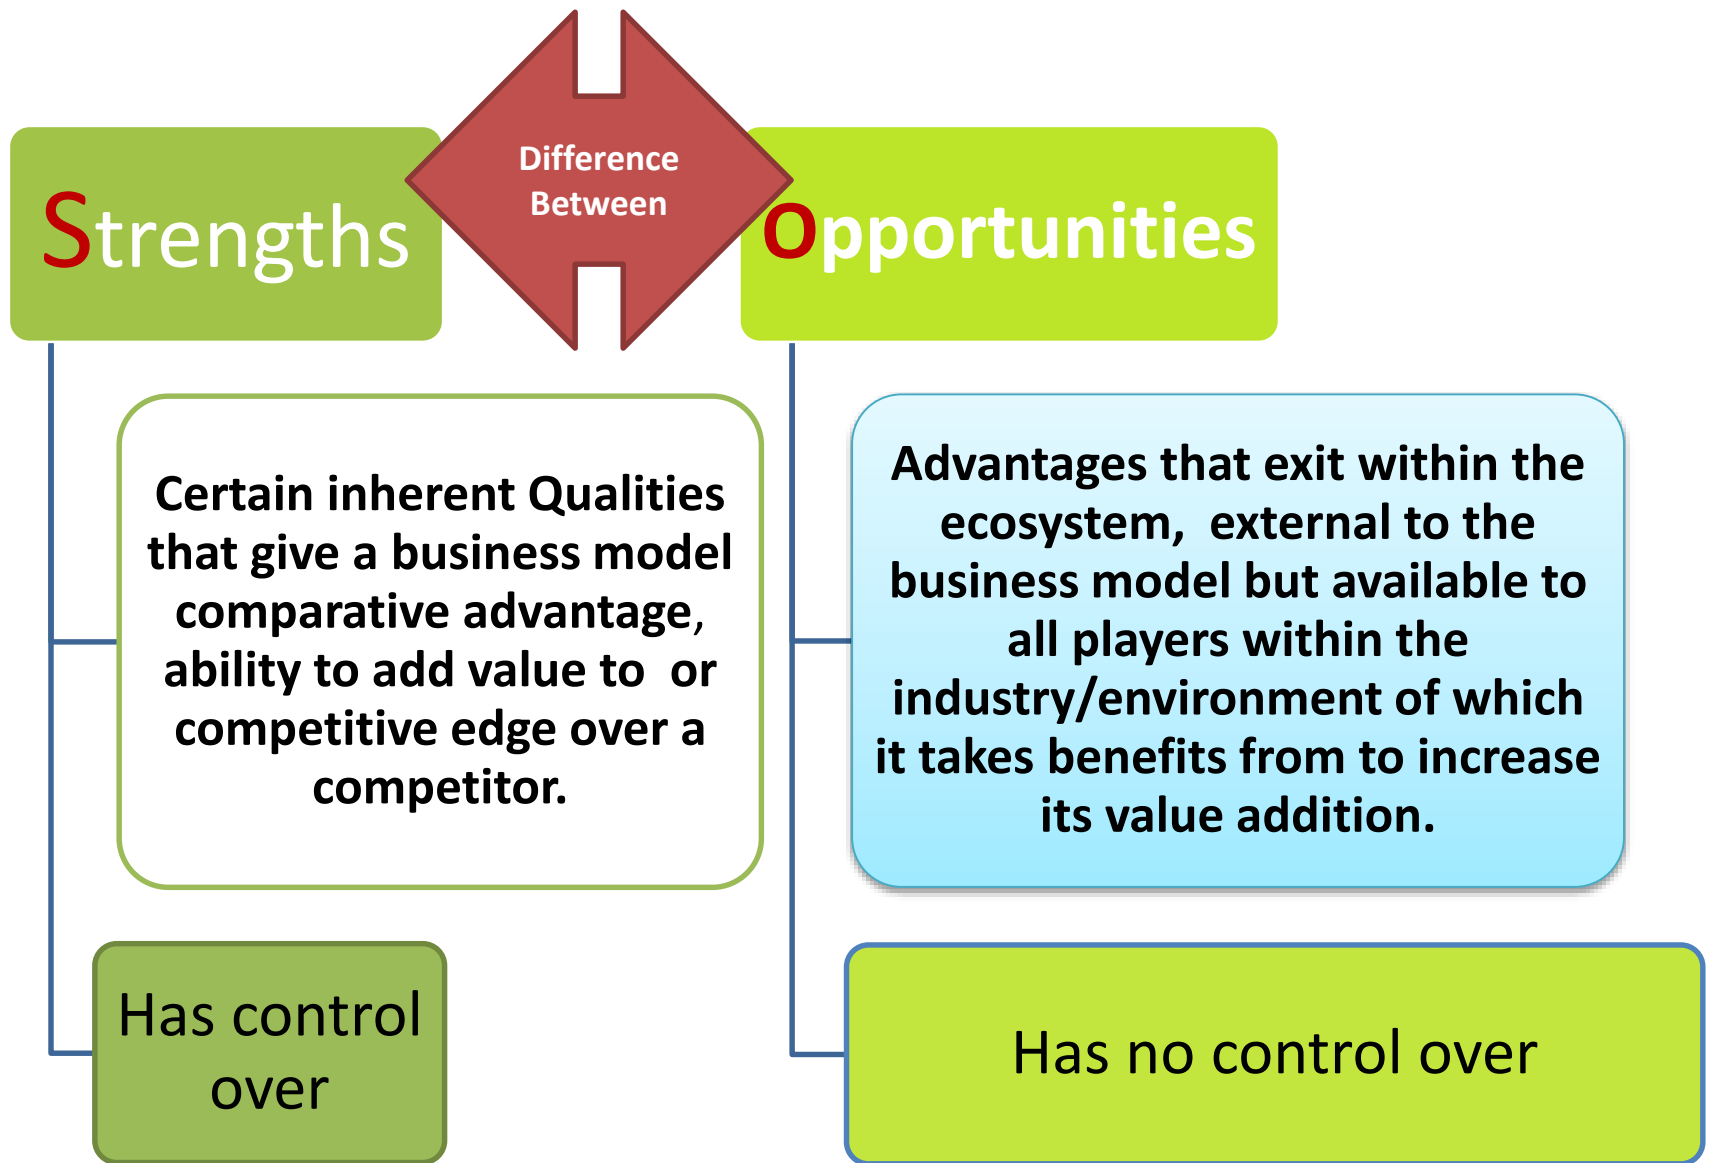

What is SWOT Analysis

- SWOT Analysis is a technique used in identifying : **S**trengths, **W**eakness, **O**pportunities and **T**hreats of a particular business model.
- The first 4 letters form the acronym **SWOT**

Strengths and Weakness = Both are Internal to the Business Model.

Opportunities and Threats = Are external to the Business Model or System's objectives.

Difference between Weakness and Threats

- Internal factors that are unfavourable in achieving the objectives of a business model
- Factors that place the business model at comparative disadvantage.

- External risks that the business model is exposed to;
- These are factors from the external environment of the business model that poses danger in achieving system objectives.

Environment of the business Model

Internal Environment (S=Favourable ;W=Unfavourable)

- Inherent ability that gives competitive advantage/competitive edge over others;
- Resources-financial, human, land, technology etc;
- Business methods;
- Special skills.

External Environment (O=Favourable; T=Unfavourable)

- Regulations
- Ecosystem-current and future technologies; current and future business methods
- Market
- Third parties-Business Partners(Actual and Potential)

Thank you
