**International Workshop of the GBEP Task Force on Sustainability**

**Linkages between the Sustainable Development Goals (SDG) and the  
GBEP Sustainability Indicators for Bioenergy (GSI)**

**July 3-4, 2017 in Bonn, Germany**

**prepared by**

Uwe R. Fritsche, Scientific Director, IINAS

Ulrike Eppler, Research Fellow, IINAS

Horst Fehrenbach, IFEU

**Darmstadt, Berlin, Heidelberg, June 2017**

## Background

The GBEP Task Force on Sustainability (TFS) is working to enhance the practicality of the GBEP Sustainability Indicators for Bioenergy (GSI) by producing an **Implementation Guide** to complement its GSI report<sup>1</sup>.

As agreed at the 13<sup>th</sup> Meeting of the TFS in 2016, it is important to understand the GSIs in the context of the **Sustainable Development Goals** (SDGs).

As a contribution to this, a **Technical Paper** is being prepared for the GBEP TFS by IINAS and IFEU, supported by the German Government. The Technical Paper will highlight the linkages between the SDGs and the GSIs and will determine how they may be mutually reinforcing.

The **draft** of the paper will be available in mid-June 2017, and is to be discussed during an **international workshop** outlined on the next pages.

After that, a final version will be prepared for approval during the 2017 GBEP meeting in Rome.
