

GBEP Meeting 28th October

Solid Biomass

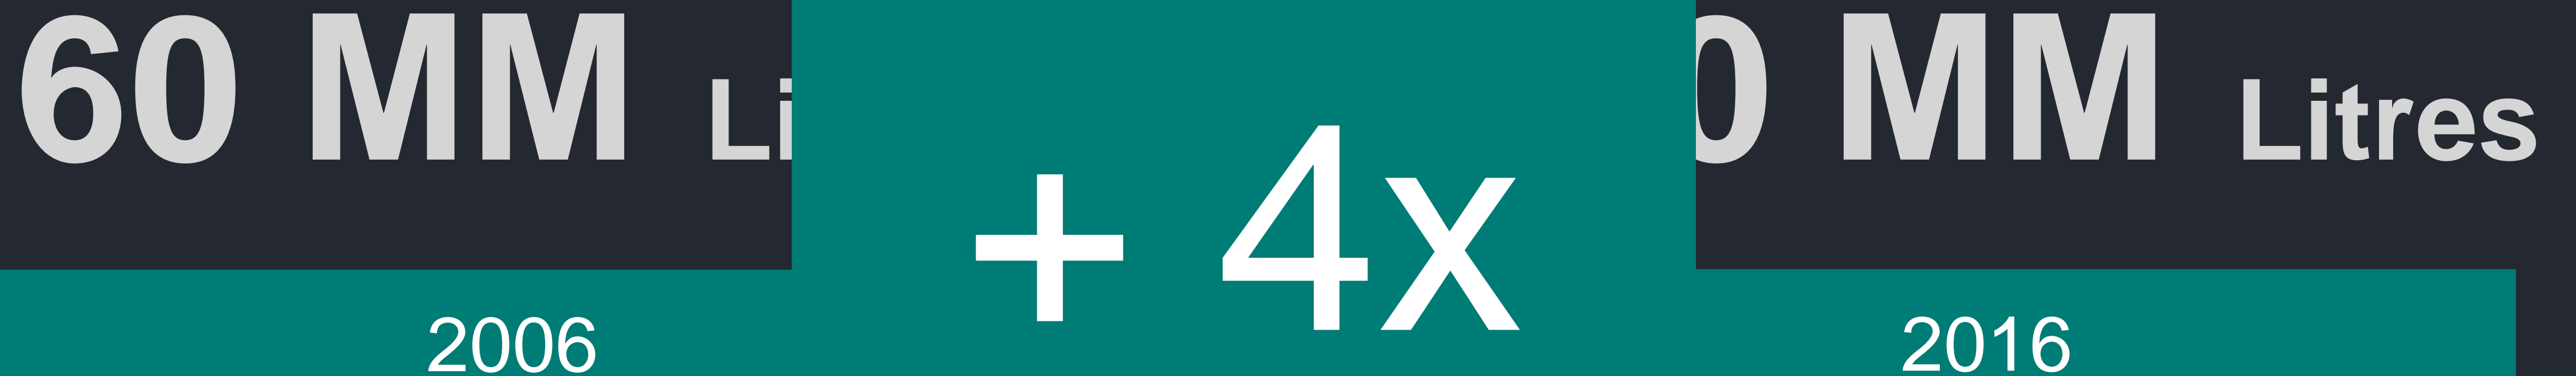

Biofuel

43% Of the energy
consumption

Law 2748/05 of “*Promotion of Biofuels*”

Ethanol Production

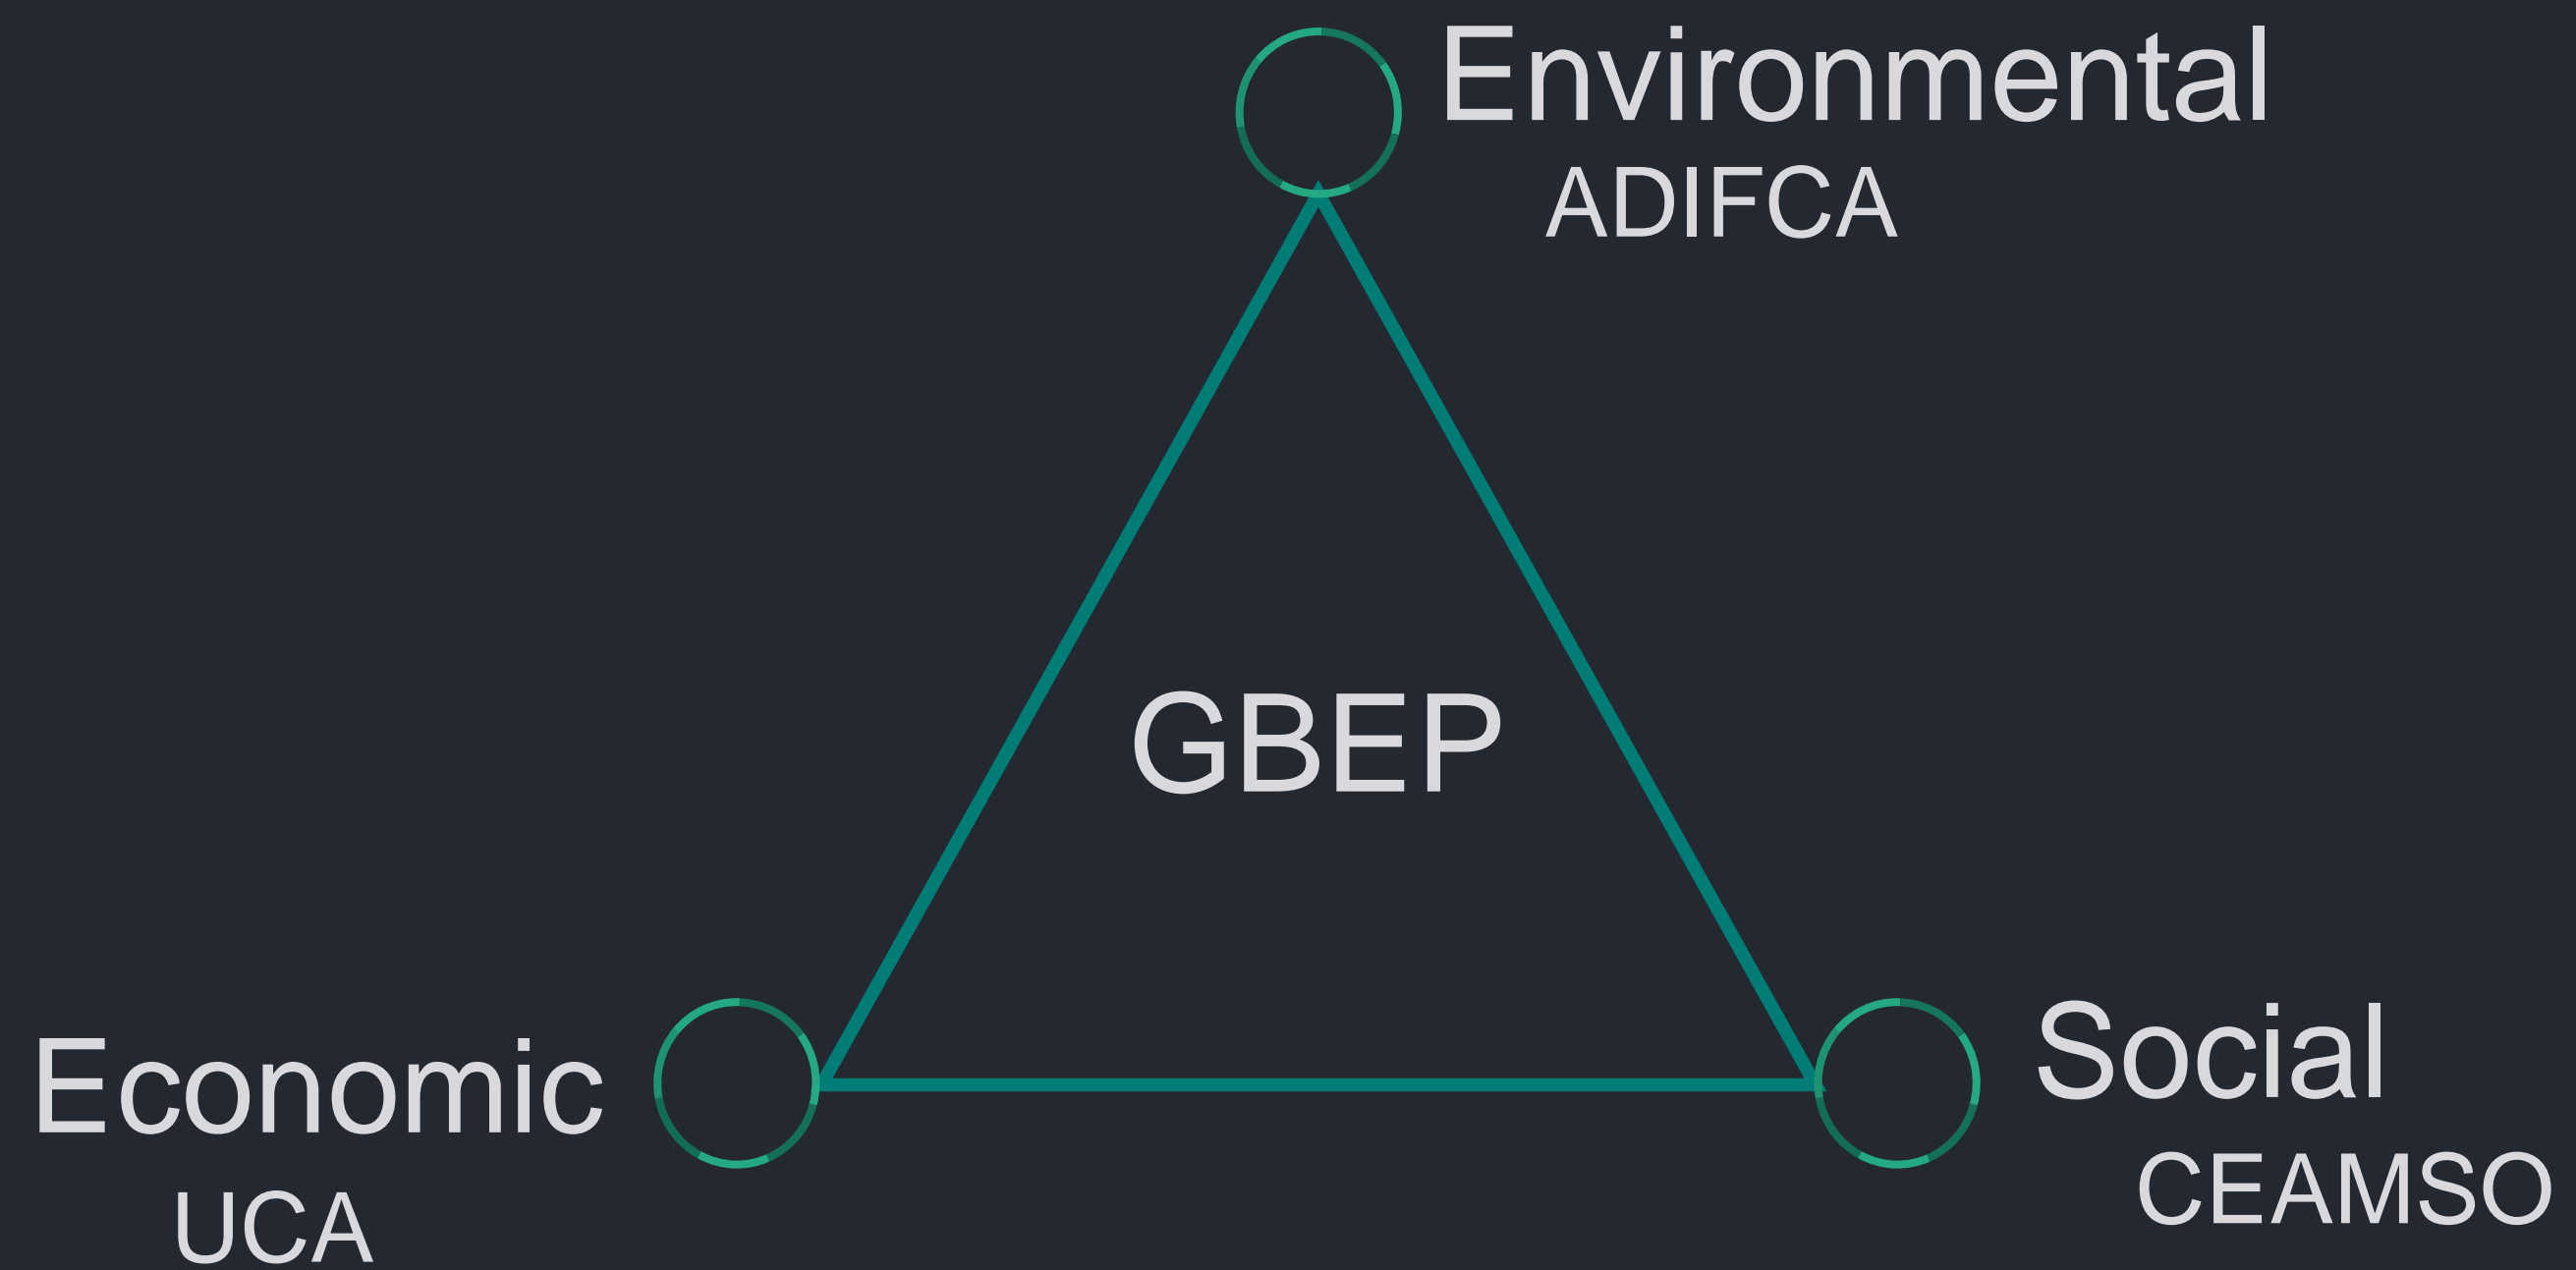

The implementation of the GBEP indicators in Paraguay has been published in 2018

The GBEP indicators will not only allow the assessment and monitoring of bioenergy sustainability, but also will support major impact projects such as for example PROEZA project.

Youth and the GBEP

-  **Provide young people with tools that will help them monitoring and improve the sustainability of their potential projects.**
-  **Create capacities in the field of Bioenergy.**
-  **Use the indicators in order to reduce the cost of permanent monitoring with help of the excellence centers that applied the GBEP.**

Ing. Mauricio Cubells (23)

Implementation of the GBEP indicators in the field of biodiesel as his undergraduate thesis for the Bachelors degree in Industrial Engineering (IE)

Scope

Enviromental Pillar:
Indicator 1
Economic Pillar:
Indicators 17,18,19,20,22 and 23
